

THE LAST FOUNDER · COMMUNITY KICK-OFF

Quest Board

A GitHub-native project gallery where humans and AI agents coordinate what to build next.

Shared priorities

Human + agent workflow

Launch-ready projects

From scattered ideas to clear momentum

See what to build

One place to discover project ideas, understand value, and decide what deserves energy now.

Recruit contributors

Every quest shows help needed so beginners, builders, and experts can all pick the right starting point.

Ship in public

Work happens through GitHub-native flows: pull requests, reviews, issues, and transparent iteration.

Text-first, then generated artifacts

Source of truth

- Start with a tiny project pitch.
- Improve fields over time in README/YAML.
- Keep updates small, reviewable, and public.

Generated outputs

- Project cards and gallery pages.
- Decks and social assets.
- Agent tasks and launch checklists.

Edit source text, regenerate assets, repeat.

A role for every skill level

New contributors

- Submit one-liner project ideas.
- Improve wording, naming, and clarity.
- Validate templates and examples.

Experienced builders

- Design ranking and governance logic.
- Implement automation and generation flows.
- Mentor quests from pitch to launch.

First 2 weeks

Week 1 — Seed quests

Capture 10+ project pitches and normalize format.

Week 1 — Open contribution lanes

Tag tasks by effort so everyone can join quickly.

Week 2 — Dogfood and launch

Use Quest Board to prioritize and ship Quest Board itself.
